<b>Outputs</b>	Speakers, Line Out (fix), Variable Out, Phono Out
<b>Inputs</b>	Bluetooth, 1 x Line (analogue)
<b>Speed</b>	33, 45 (manual speed change)
<b>Principle</b>	Belt drive
<b>Platter</b>	300 mm acryl
<b>Main bearing</b>	Stainless steel in bronze bushing
<b>Tonearm</b>	8.6" aluminium
<b>Supplied accessories</b>	Power supply, dust cover, remote control, speaker cables, damping feet
<b>Power consumption</b>	150 W max
<b>Dimensions (Juke Box S2)</b>	415 x 118 x 334 mm (WxHxD)
<b>Dimensions (Speaker Box 5S2)</b>	160 x 255 x 210 mm (WxHxD)
<b>Weight (Juke Box S2)</b>	5 kg netto
<b>Weight (Speaker Box 5 S2)</b>	4.2 kg netto
<b>Colour options</b>	Walnut, Eucalyptus

## Juke Box S2: All in one - perfectionised

Building on the ground breaking Juke Box E, Juke Box S2 is taking the first audiophile all-in-one system to the next level. By changing to a more sophisticated acrylic platter and an upgraded, Pro-Ject proprietary, cartridge we gave the Juke Box the extra bit of audiophilia it deserves. Not only the used technologies were addressed in the designing process of Juke Box S2. We are also offering the turntable in elegant wooden frames. Juke Box S2 now comes standard in walnut or eucalyptus finish, which aesthetically boosts the record player and enables it to fit in any living arrangement.

Juke Box S2 effectively saves space by implementing a pre-amplifier and power amplifier in its chassis. With the rated 50 Watts per channel it you will be able to use your stereo speakers and enjoy realistic sound stages and great depth.

Let Juke Box S2 take you away on a trip through your favourite music. Juke Box S2 doesn't stop at playing vinyl though, you will also be able to connect your smart devices via Bluetooth and listen to your music wireless. On top of that, another analogue input can be found on the back side of Juke Box S2. Simply connect a secondary source and use Juke Box S2 as an amplifier for your speakers. Rediscover your treasures or take your first steps into the endless waters of music-enjoyment.

Juke Box S2 is the perfect solution for everyone who is looking for an upgraded hifi experience in his life, but can't find the room for a tower of two-channel electronics.

## Juke Box S2 Stereo Set: High end and all-in-one

Most all-in-one systems stick to one pattern, they keep the speakers in the housing of the turntable. While this might be a nice solution for saving space, it introduces a very critical problem for audio reproduction. When a speaker is sitting basically in the turntable, the moving parts of the speakers pass on vibrations to the tonearm. This is a cause for a distorted sound and on top can harm both the needle and the vinyl. No true audio enthusiast would want that.

Additionally to a harmful experience for the needle and the record, the listener will not be able to enjoy a real two-channel sound. Even though in theory the built-in speakers of such all-in-one systems might be set up as a stereo pair, the reality proves that only a mono sound can be heard in the end. This is because the drivers of the

speakers are too close together to form an honest stereo image.

The Juke Box S2 Stereo Set solves all these problems by simply putting the speakers outside of the turntable. This way the listener will be able to place the speakers in a distance that allows him to enjoy a real stereo sound. The supplied bookshelf speakers, Speaker Box 5 S2, convince with a realistic sound, punchy and well driven bass and emotional mids with clear highs. With the supplied speaker cables, Connect it LS, the Speaker Box 5 S2 can be connected and allow a very easy setup with a plug&pay character.

The Juke Box S2 Stereo Set proves that all-in-one systems can be high end and don't have to harm your records.

## Juke Box S2 - the story behind it

Turntables and the analogue experience have gained in popularity the last few years, many people are searching for a **true and simple plug-and-play solution**. A lot of products have been introduced to the market which are supposed to end this search, though there have only been two solutions so far, which in our opinion still are not adequate to enjoy the full potential of analogue players.

*TURNTABLES WITH BUILT IN SPEAKERS:* Probably the most popular solution. Those are mostly made in far-east with cheap construction and toy-like build quality. These products are very far from the analogue sound as it is supposed to be, they even are close to destroying your valuable records. The built-in speakers also *cause lots of vibrations* which are picked up from the cartridge, the outcome is a very distorted and boomy sound. On top of that, you won't get close to a real concert-like stereo feeling, as the speakers are too close to each other to form a room-like sound stage.

*ACTIVE SPEAKERS PLUS TURNTABLE:* The problem here is that the cable from the turntable to the speakers can be maximum 1.2 meters. This again causes many distortions and a coloured sound. With the short distance between the speakers of approximately 2 meters you will also not create a stereo effect. If you would like to add a second source, like a CD player or even your smartphone, you will very likely come into difficulties with the cabling.

We believe that the **only true solution** to this request is our *active turntable Juke Box S2*. It offers built-in pre and power-amplifier, which allows you to place the speakers far away from each other to minimize the possibility of acoustic feedback and to create a real analogue stereo experience.

With *Juke Box S2* we want to show all vinyl enthusiasts and growing audiophiles, how easy and great a music experience from a modern record player can be!
